

European partners of MonitorEE's project

- 1 Consortium Extremadura Energy Agency (Spain)
- 2 South-West Oltenia Regional Development Agency (Romania)
- 3 Marshal's Office of the Mazowieckie Voivodeship (Poland)
- 4 Environmental Protection and Energy Efficiency Fund (Croatia)
- 5 Lappeenranta Municipality (Finland)
- 6 Paris Climate Agency (France)

MonitorEE

promotes the use of smart management systems as a tool to reach the EU targets set for buildings by accelerating their renovation rate.

MonitorEE promotes the use of smart management systems and energy consumption follow-up to achieve European energy renovation objectives.

BUDGET
1.12 M €
FINANCING
EU

March 2023
May 2027

Objectives

Development of a methodology to measure and follow-up the real energy efficiency of buildings before and after energy renovation.

Sharing good practices in the field of energy monitoring systems.

Recommendations to improve public policy tools, to develop energy renovation projects to a large scale.

Expected results

Estimation and comparison between real energy savings, after renovation works, and theoretical energy savings.

Implementation of the methodology as a simplified energy assesement in CoachCopro dedicated to co-owners.

Contributing to the development of effective public policies with tangible recommendations to achieve objectives set in the Paris Climate Plan in terms of energy renovation.

Activities and key actions

2nd Study visit in Paris – november 2023

Local Stakeholders Meeting in Paris – september 2023

3rd study visit in Craiova (Romania) – may 2024
